DEEP QUERY ASK

CASE MANAGEMENT

Project Overview

Project Name: Customer Support Case Management

Salesforce Cloud Used: Service Cloud

Role Focus: Salesforce Business Analyst

The organization wants to modernize and standardize how customer complaints and support requests are handled by implementing Salesforce Service Cloud as a centralized support system.

In Scope

- Case creation (Email-to-Case / Web-to-Case)
- Case assignment rules
- Case lifecycle management
- SLA tracking using Entitlements
- Case escalation rules
- Reports and dashboards

Out of Scope

- Telephony (CTI) integration
- Chatbot or AI-based support
- ERP or billing system integration
- Knowledge base automation (optional future phase)

Business Requirements

ID	Requirement	Priority	Acceptance Criteria
BR-01	Centralize customer support cases in Salesforce Case.	High	Every supported issue is represented by a Case record.
BR-02	Create Cases from customer email.	High	A valid support email creates a Case with Origin = Email.

BR-03	Create Cases from website form.	High	A valid web submission creates a Case with Origin = Web.
BR-04	Automatically assign Cases.	High	New Cases are routed to the configured user/queue using Assignment Rules.
BR-05	Capture required Case information.	High	Case Type, Priority, Status, Origin and Description are available and governed as required.
BR-06	Track Case lifecycle.	High	Cases can be monitored from creation through resolution and closure.
BR-07	Monitor SLA.	High	Entitlement/Milestone information can be used to monitor SLA timelines.
BR-08	Escalate applicable Cases.	Medium	Defined escalation criteria route cases for attention.
BR-09	Provide management reporting.	High	Reports show case volume, status, priority, type, owner, origin and SLA information.
BR-10	Provide dashboard visibility.	High	Dashboard provides real-time operational metrics and trends.

Functional Requirements

FR ID	Functional Requirement	Related Salesforce Capability
FR-01	Create and maintain Case records.	Case Object
FR-02	Capture Case Type, Priority, Status, Origin and Description.	Case Fields / Picklists
FR-03	Accept customer emails and convert them to Cases.	Email-to-Case
FR-04	Accept website submissions and convert them to Cases.	Web-to-Case
FR-05	Assign Cases based on business conditions.	Case Assignment Rules
FR-06	Track status and ownership changes.	Case History

FR-07	Track SLA rules and milestones.	Entitlements / Case Milestones
FR-08	Store communication updates.	Case Comments
FR-09	Restrict visibility/access based on user roles.	Role Hierarchy / Salesforce Security
FR-10	Analyze support performance.	Reports & Dashboards

Case Field Requirements

Field	Type / Values	Required	Business Purpose
Case Type	Picklist	Yes	Categorize customer issue.
Priority	Picklist: Low/Medium/High/Critical	Yes	Determine urgency.
Status	Picklist / Case lifecycle	Yes	Track current stage.
Origin	Email / Web / other configured channels	Yes	Identify the intake channel.
Description	Long Text	Yes	Capture issue details.
Owner	User/Queue	System-assigned	Establish responsibility.
Entitlement	Lookup/relationship	As applicable	Identify SLA policy.
Case Milestone	SLA milestone	System-driven	Monitor SLA timeline.

Case

Details	Fields & Relationships 42 Items, Sorted by Field Label		
Fields & Relationships			
Case Page Layouts	Case Origin	Origin	Picklist
Case Close Page Layouts	Case Owner	OwnerId	Lookup(User,Group)
Lightning Record Pages	Case Reason	Reason	Picklist
Buttons, Links, and Actions	Case Source	SourceId	Lookup(Email Message,Messaging Session)
Compact Layouts	Closed When Created	IsClosedOnCreate	Checkbox
Field Sets	Contact Email	ContactEmail	Email
Object Limits	Contact Fax	ContactFax	Phone
Record Types	Contact Mobile	ContactMobile	Phone
Related Lookup Filters	Contact Name	ContactId	Lookup(Contact)
Search Layouts	Contact Phone	ContactPhone	Phone
List View Button Layout	Created By	CreatedById	Lookup(User)
Hierarchy Columns	Date/Time Closed	ClosedDate	Date/Time
Scoping Rules	Date/Time Opened	CreatedDate	Date/Time
Object Access	Description	Description	Long Text Area(32000)
Field Access	Engineering Req Number	EngineeringReqNumber__c	Text(12)
Triggers	Entitlement Name	EntitlementId	Lookup(Entitlement)
Flow Triggers	Escalated	IsEscalated	Checkbox

Email-to-Case Requirements

Item	Requirement
Enablement	Enable Email-to-Case and On-Demand Service.
Routing	Configure routing address and default Case values.
Email Verification	Complete Salesforce email verification/access step.
Gmail Forwarding	Forward customer/support email to Salesforce Email-to-Case address.
Case Defaults	Configure owner, priority and origin as agreed.
Task	Create a Task from Email where configured.
Testing	Send test email and verify Case and related Task creation.

Email-to-Case

Customize the way Salesforce converts customer emails to cases. After you configure your Email-to-Case settings, add routing addresses. Each routing address is an existing email address that your customers can use to submit cases to your support team. Emails automatically convert to cases based on the routing address's settings.

Settings

After you enable Email-to-Case, you can't disable it, but you can update its settings.

☒ Enable Email-to-Case

☒ Notify case owners on new emails

☐ Let reps move emails

☐ Create HTML email

☒ Set case source to email

☐ Save Email-to-Case attachments as Salesforce files

☐ Include triggers on object change from new to feed

☐ Reply with new content only

☐ Send emails via external services

☒ Insert email threading links in email body

☐ Use email headers for threading

☐ Place user signatures before email threads

Routing Addresses

Action	Source	Routing Name	Case Owner	Email Address	Verification	Controlled by Permission Set	Email Service Address
Edit	EmailCase	Email to Case Study		ps458173@ps4.com	Verified	No	ps458173@ps4.com

Email-to-Case Routing Address

[Email-to-Case Setup](#)

Email-to-Case Routing Address Detail

Routing Information

Salesforce automatically created the following email service address for you: ps458173@ps4.com. Configure your email system to forward messages received at ps458173@ps4.com to this email service address.

Email Settings

☐ Save Email Headers

☐ Forward Email From

Task Settings

☒ Create Task from Email

Case Settings

Case Owner: Medium

Case Priority: Medium

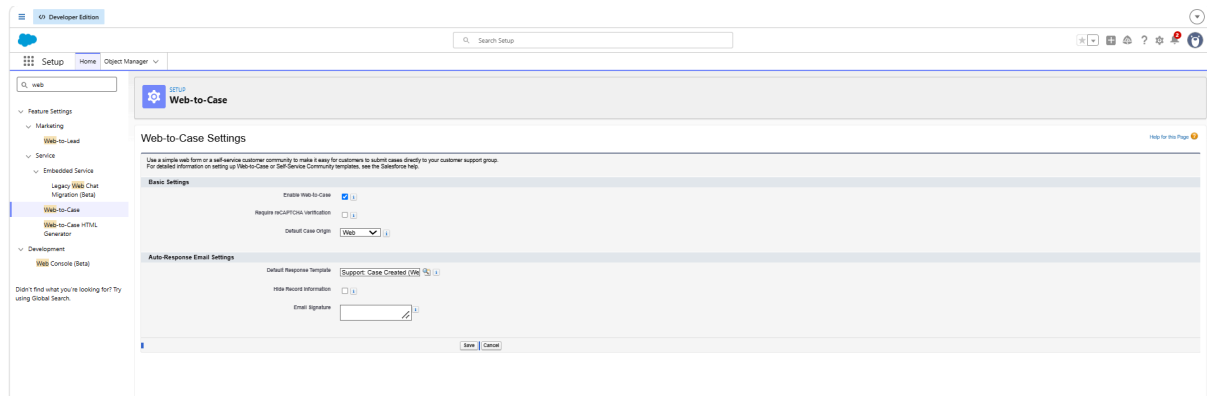

Case Origin: Email

Flow Settings

Order Channel Flow: Publish Queue

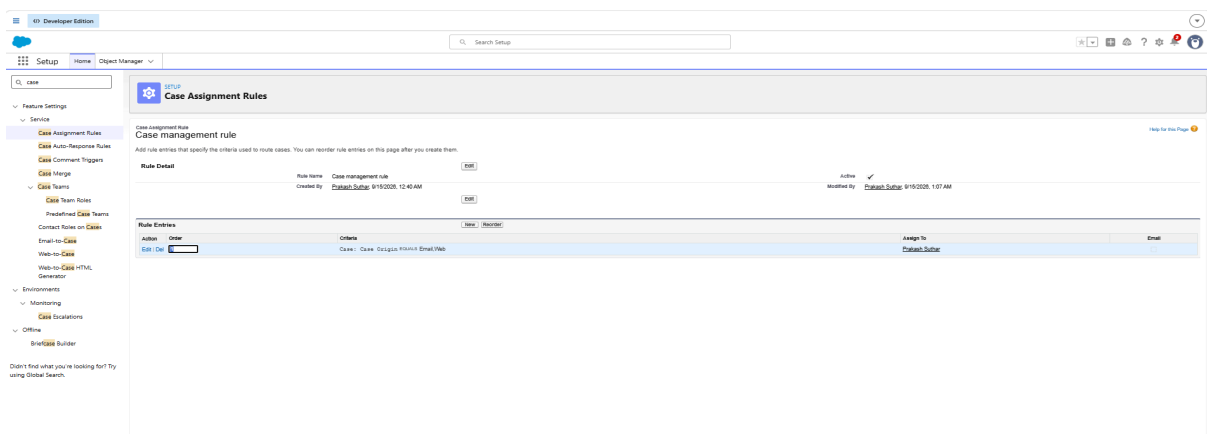

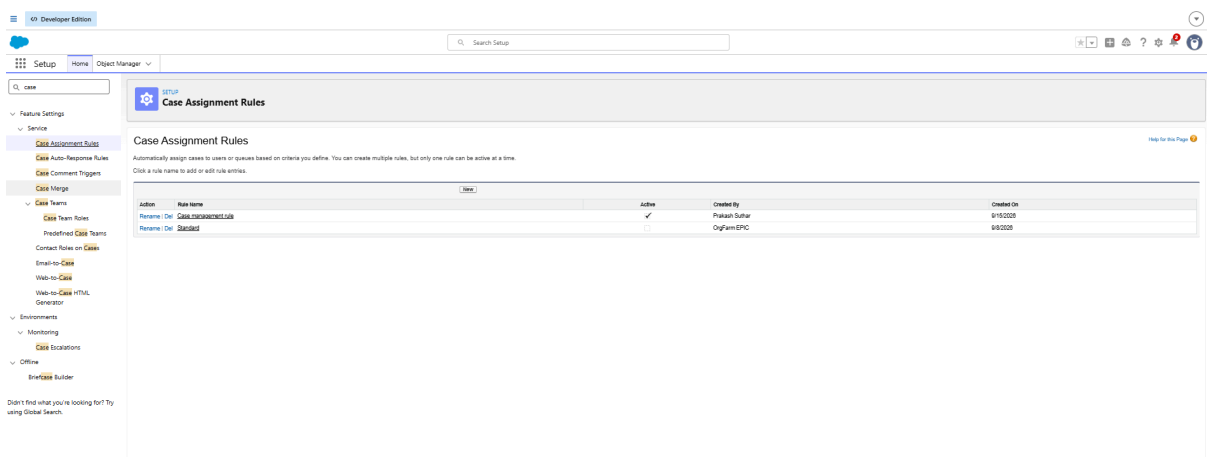

Web-to-Case Requirements

Item	Requirement
Enablement	Enable Web-to-Case.
Origin	Default Case Origin = Web.
Form	Generate web form using Web-to-Case Generator.
Fields	Select required customer and Case fields.
HTML	Save generated HTML and publish/use it as the support form.
Testing	Submit a test form and verify Case creation in Salesforce.

Case Assignment Requirements

Rule Dimension	Business Requirement	Expected Outcome
Case Type	Route cases according to defined Case Type.	Correct support team/user receives the Case.
Priority	Use priority to identify urgent handling.	High/Critical cases receive appropriate attention.

Data Model Requirements

Object	Purpose	Relationship
Account	Customer organization	Account → Contact; Account → Case
Contact	Customer individual	Contact → Case
Case	Customer complaint/support request	Case → Entitlement; Case → Case Milestones
Case Comment	Communication updates	Related to Case
Case History	Status and ownership changes	Related to Case
Entitlement	Defines SLA rules	Related to Case
Case Milestone	Tracks SLA milestones	Related to Case
User	Support agent	Owns/works Cases

Report

Report	Purpose
Open Cases by Status	Monitor New, Working, Escalated and other lifecycle statuses.
Cases by Priority	Monitor Low, Medium, High and Critical workload.
Cases by Case Type	Understand issue categories.
Cases by Origin	Compare Email-to-Case and Web-to-Case intake.
Cases by Owner/Agent	Review workload and productivity.
SLA Risk / Violations	Identify cases requiring attention.

Dashboard

Component	Purpose
Total Open Cases	Current open workload.
Cases by Status	Lifecycle distribution.
Cases by Priority	Urgency distribution.
Cases by Case Type	Issue-category distribution.
Cases by Origin	Channel usage.
Cases by Agent/Owner	Workload distribution.
SLA Risk / Violations	Cases requiring attention.
